

The Happenings of the Counseling Center...

THANK YOU!

We just wanted to thank all of the teachers who helped us with suicide prevention lessons. We know how busy you are and appreciate your willingness to let us come in and talk about such an important topic.

Registration

We have almost all of our 7th and 8th graders registered for next year! 😊 This week we will be working with 6th graders who will be coming to our school next year. We have a 6th grade parent orientation night on Wednesday and should have all of them registered by next week. The deadline for 6th grade registration is Wednesday, February 18th.

8th Grade PCCRs

We have started meeting with all of our 8th graders and their parents to create Plans for College and Career Readiness. In these meetings, we discuss high school graduation requirements, 4 year plans, Explore test results, advanced placement courses, and JATC opportunities. It is important for these students to begin thinking about their future and setting goals for themselves. Those 8th grade students whose parents have not set up appointments with us, we will be calling down individually within the next couple of weeks.

College and Career Week (March 2nd-5th)

We are excited to have our College and Career week coming up! We have a lot of fun activities planned including colleges coming to visit with students and a Career day where students can learn about various careers they may be interested in. We would like to create a "college going" culture within our school where students know the opportunities available to them and plan for higher education—whether that be earning certifications or attending 4-year universities. The earlier we talk to students about their futures, the more informed and better prepared they will be to make those decisions.
